PROFILE SUMMARY

Full-stack developer building production web applications with Next.js, React, Node.js, and Go.
Designed concurrent, pluggable backend systems in Go; experienced with Docker and CI/CD pipelines.
Integrated AI APIs (Gemini, YOLOv8) into real-world applications across healthcare, finance, and security domains.

TECHNICAL SKILLS

Languages: Go, Python, JavaScript, SQL, HTML, CSS
Frontend: React.js, Next.js, Tailwind CSS, GSAP
Backend: Node.js, Express.js, Gin, Goose, SQLC, Prisma ORM, PostgreSQL, MongoDB
DevOps & Tools: Docker, Git, GitHub, Vercel, CI/CD Pipelines, Postman
Other: Linux, REST API Design, Gemini AI, YOLOv8

PROJECTS

- Medusa** GitHub
 - Built a concurrent multi-camera incident monitoring platform in Go — each camera stream runs in its own goroutine, supporting webcam, local video, and RTSP inputs via a single config file.
 - Tech Stack: Go, Python (YOLOv8 detection engine), JSONL, YAML.
 - Designed a pluggable detection pipeline that spawns an isolated Python process per camera and captures its stdout as structured JSON events, decoupling the core platform from any specific AI model.
 - Built a full CLI with commands to start the pipeline, inspect config, query logs by date and camera, and export events to CSV for external analysis.
- MediCall** Live Demo | GitHub
 - Built a full-stack doctor appointment platform with real-time video consultations and credit-based booking.
 - Tech Stack: Next.js, Prisma ORM, Clerk Auth, Neon PostgreSQL, Vonage API.
 - Implemented scheduling logic that eliminated double-booking conflicts during pilot testing.
- Finance Genie** Live Demo | GitHub
 - Built an AI-powered financial assistant for expense tracking, categorization, and budget insights.
 - Tech Stack: Next.js Server Actions, Prisma ORM, PostgreSQL, Gemini API.
 - Used Gemini to generate personalized spending recommendations based on transaction history.
- Sensai** Live Demo | GitHub
 - Built an AI mock interview assistant with real-time voice interaction and personalized feedback.
 - Tech Stack: Next.js, Gemini AI, Web Speech API.
 - Implemented role-specific question generation and post-session performance analysis.
- Reflect** Live Demo | GitHub
 - Developed a journaling and mood-tracking web app with per-user data isolation and auth.
 - Tech Stack: Next.js, Prisma, Clerk Auth, PostgreSQL.
 - Optimized DB queries using indexed lookups, reducing page load time by ~40%.

EDUCATION

- Delhi Technical Campus, IP University** Greater Noida, India
Bachelor of Technology in Computer Science and Engineering (2nd Year) 2024 – 2028
- Kerala School, R.K. Puram** New Delhi, India
Class XII (CBSE) – 82.4% 2024

ACHIEVEMENTS

1st Place — Google Developer Groups DSA Competition (Delhi Technical Campus), outperforming peers in algorithmic problem solving.
Reached **Semi-Finals of Supernova Hackathon (2024)** for *ManMitra*, a mental health platform evaluated by 5+ industry judges.
Presented full-stack and AI projects at university showcases, receiving feedback from faculty and peers.
